The character 休²²(休) to rest, be happy, pictures a person resting and enjoying the tree 木 of life.

$$\begin{array}{c} \text{person} \\ \uparrow \\ \gamma \end{array} + \begin{array}{c} \text{tree} \\ \uparrow \\ \times \end{array} = \begin{array}{c} \text{to rest, be happy} \\ \gamma \times \end{array}$$

Might there also be a graph representing the tree of the knowledge of good and evil? The character currently meaning *mulberry tree* 桑²³(桑) which has reaching hands 才 for branches, would appear to describe this tree. Note that two *mouths* 口 + 口 (口), indicating eating, are found at this tree in the character *to die, lose, ruin, perish* 肴²⁴ (壞). One more evidence that 桑 is the forbidden tree is that 桑 and 桑 are phonetically identical ("sang"), except for tone.

Eve answered, showing that she understood exactly the restrictions God had made:

"We may eat the fruit of any tree in the garden ... except the tree in the middle of it. God told us not to eat the fruit of that tree or even touch it; if we do, we will die."¹²

But the devil scoffingly answered, "You will not surely die."¹³ By this statement, the devil was completely negating what God had said. How interesting that one oracle bone character for *negative, no, not* 弗¹⁴ (弗) depicts the serpent 蟠 in the forbidden tree 树, which stood next to the tree 树 of life. A more common oracle bone writing is written simply as 廿.

The woman saw that the tree was good for food, that it was pleasant to the eyes, and a tree desirable to make one wise.¹

She looked at the forbidden tree and saw that it was “pleasant to the eyes,” with beautiful fruit. The fruit was *desirable* or “*covetable*” 妒² (妒). In this character, we find the *woman* 女 facing one *tree* 树, coveting the fruit, with her back to the second *tree* 树. These characters record that it was not Adam, but the *woman* 女 who initially distrusted ShangDi and disregarded His warning.

Both *cruel* 僕 and *older brother* 兄 are pronounced "bsiung." The Lord drove Cain away. It is written that "Cain went out from the presence of the Lord."³⁴ He no longer worshiped at the gate 門 of Eden, where "God's presence" was manifested. Cain and his wife (his sister) became the ancestors of a rebellious race who hated God.

I was curious to know how he happened to become devoted to delving into the mysteries of the Chinese characters. About 40 years ago in China, he explained in a letter, he had been distributing Bible portions of the Book of Genesis as a chaplain in a mission hospital. A return visit to one patient's room resulted in a confrontation with a very intelligent but puzzled Chinese lady who told him what she thought of the tract: "It is a very fine fairy tale for children but hardly worth an adult's time!" She proceeded to let him know that in her opinion educated people believe in the evolutionary theory of origins.

Our Chinese friend was embarrassed that he had, at that time, too little scientific persuasive evidence to substantiate the Genesis narrative of beginnings. He himself had always accepted it by faith — simply as the Word of God. He wrestled with the problem for days until something that he had observed in a footnote of a Mandarin textbook used by a missionary came to mind. The character 船,² meaning *boat*, had been analyzed as follows: 舟 a vessel; 八 eight; and 口 mouth or person. A comment followed that, interestingly, Noah's ark, the first great boat, had just eight passengers: Noah and his wife, with his three sons and their wives.

"If this is not a mere happenstance, there should be other Biblically relevant characters," reasoned Kang. Quickly he wrote down the character for *to create* 造,

the small downward indicates movement or life; and the text in Genesis 2:7 came the Lord God formed man and breathed [with his mouth] of life; and man became a living being (but an adult, able to walk). This stimulated Pastor Kang's a search which has lasted four years.

My personal study into Chinese language through various found in Harvard's Chinese-Japanese dictionary gave its approximate time of origin. The date of creation is provocative, for it corresponds to the time (2218 B.C.) of the confusion of tongues from the tower of Babel, as can be seen in the genealogies in a recent chronology.

Discussion of this project with friends from the Orient and friends presented the question: How does one know that the Chinese language is very ancient and not more than 2,000 years old? The influence of Christianity on Chinese language is evident in two or three centuries, for they have adopted many of their religious concepts? The Chinese language is basic, fundamental, primitive, and archaic. Many words are involved, including go, desire, beginning, complete, etc., and others such as drown, cruel, rebellion, and so on.

A few friends versed in Chinese brought up the possibility that the Chinese language is more archaic than "ideographic" or pictographic.

clandestine approach to Eve. These three symbols, together with the "p'ieh" / indicating "alive," are combined in *the devil* 鬼.

But to be more specific, the *devil* 鬼 radical is then placed under the *cover* 广 of protecting *trees* 林. The *devil* 鬼 waited for Eve in the forbidden tree, which was located in the middle of the garden next to the tree of life—hence the two *trees* 林. Furthermore, he was under *cover* 广, being hidden in the tree and also camouflaged as a serpent. By uniting these primitive pictographs into an ideographic character, the word *tempter* 魔 appears to have been designed. Or were these six significant constituent symbols brought together by mere chance?

The preceding serves to illustrate the purpose of this book in exploring some of the pictographic and ideographic types of Chinese characters in order to unlock what we believe is a parallel account of the fascinating chronicle of beginnings. A feature which makes this

this figure for the first time: 土 is *dust or mud*; 口 a mouth; 丶 the small downward stroke to the left of 土 indicates *movement or life*; and 走 means *able to walk*. The text in Genesis 2:7 came to his mind. "Then the Lord God formed man of *dust from the ground*, and breathed [with his *mouth*] into his nostrils the *breath of life*; and man became a living being" (not a baby but an adult, *able to walk*). Dissection of this character stimulated Pastor Kang's interest and resulted in a search which has lasted four decades.

My personal study into the history of the written Chinese language through various treatises in English found in Harvard's Chinese-Japanese Yenching Library gave its approximate time of origin as 2500 B.C. This dating is provocative, for it coincides quite closely with the time (2218 B.C.) of the great dispersion of races from the tower of Babel, as calculated from the Biblical genealogies in a recent chronological study.³

Discussion of this project with other missionaries from the Orient and friends precipitated some questions. How does one know that these characters are actually ancient and not more recently contrived through

Lano, co k nebi nás poutá

Jarda Svoboda (TRABAND)

Já sedával v přístavu, popíjel kořalu, s holkama laškoval
A bylo mi fuk, co je, hlavně když fajfka mi doutná
Co bylo, už není, všechno mý jmění jsem dávno rozfofroval
Jsme silný, jak silný je lano, co k nebi nás poutá

Ale najednou zmatek, když vešel ten chlápek, na mou duši!
Objedná si drink a sedne si vedle do kouta
Pak se nakloní ke mně a povídá jemně: Matouši,
Jsme silný, jak silný je lano, co k nebi nás poutá

Já povídám: Pane, odkud se známe? Esli se nemýlíte?
A co je vám do mě, starýho mrchožrouta?
On na to: Pojd', dej se na moji loď, má jméno Eternité
Jsme silný, jak silný je lano, co k nebi nás poutá

Ty jeho slova se zařízly do mě, jako bys břitvou šmik
Jako když po ránu vzbudí tě křik kohouta
Tak povídám: Jdem! A ještě ten den stal se ze mě námořník
Jsme silný, jak silný je lano, co k nebi nás poutá

Tak zvedněme kotvy a napněme plachty, vítr začíná vát!
Černý myšlenky vymet' me někam do kouta
Hudba ať hraje o dobytí ráje, ted' není čeho se bát
Jsme silný, jak silný je lano, co k nebi nás poutá
